

Digital Food Safety Warehouse Program

Iron Apple's Quality Assurance program is a digital food safety compliance software designed for cold storage, warehouse, & distribution companies to easily implement and maintain their food safety program. You will have access to all of the necessary forms, documents, and procedures, through our mobile & desktop friendly web-based platform or through our smart-phone app.

Visit www.IronApple.net for more information.

About Iron Apple

Iron Apple specializes in food safety applications for food transporters and cold storage facilities to easily meet compliance through the use of records and technology. Our solutions can be used in a stand-alone environment or can be fully integrated through our Open API data structure allowing for other software to easily adapt to provide you a streamlined solution with minimal interruptions to your business. This software is ideal for any carrier, owner operator, broker, shipper, or storage facility that transports / stores perishable and non-perishable food products.

COMPLIANCE TOOLS

All required documents, checklists, forms, and procedures needed to meet HACCP and Preventive Control requirements for storage, warehouse, and distribution companies throughout North America.

EASY ACCESS & RETREIVAL

Web-based digital platform, mobile friendly and easy to use. Smart phone app for Android and iOS designed for all types of roles including drivers, loaders, unloaders, & sanitation teams.

INTEGRATION & OPEN API

Food safety compliance software can easily be used in a stand-alone environment or can be fully integrated through our Open API data structure to streamline with existing software.
